IMPORTANT INFORMATION ABOUT YOUR BILL

- ▶ The EmPower MD charge funds programs that can help you reduce your energy consumption and save you money. For more information, including how to participate, go to BGESmartEnergy.com.
- ▶ Even out your energy bills with Budget Billing-sign up at BGE.com/budget billing.

ATTENTION!

We know bills are high and that matters to us.

MARYLAND'S ENERGY PROBLEM — AND WHAT IT MEANS FOR YOUR BILL.

Blackout Risk

When demand is high ↗ and power supply is low ↘ the system becomes less stable, extreme heat and cold increase outage risk and blackouts become more likely.

Not enough power means higher bills and higher risk for customers.

If Nothing Changes...

- ↗ Blackout risk increases
- ↗ Energy prices keep rising
- ↗ Private power plant company profits grow

Why your electric bill is going up ↗

The biggest part of your bill is the cost of PJM Supply which is generated by private power plant owners like Calpine, NRG, Talen Energy, Vistra and Constellation.

Customers are seeing the impact of multiple forces at once. These factors together are driving upward pressure on bills.

PJM Supply costs

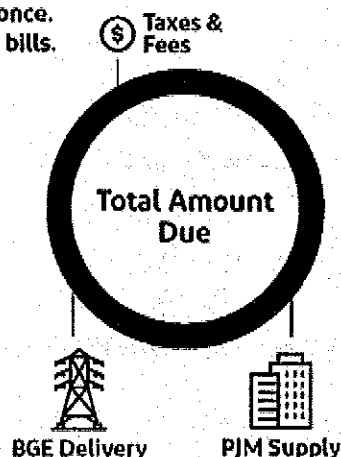

A charge for the electricity provided to you during the billing period. BGE does not control or profit from PJM Supply costs.

Delivery costs

The cost of wires, poles and equipment that deliver electricity safely and reliably to your home or business.

Fees

State and local taxes, fees, and credits including EmPOWER Maryland charges that fund energy-efficiency programs that are paid directly to the state or support state programs.

What BGE is doing for customers

Connecting customers to available assistance, including through our Customer Relief Fund.

Expanding programs that help reduce energy use and lower bills.

Protecting customers from cost impacts tied to large energy users like data centers.

Investing in technology to reduce outages and keep costs lower over time.

Advocating for utility generated energy to increase supply.

IMPORTANT INFORMATION ABOUT YOUR BILL

- ▶ The EmPower MD charge funds programs that can help you reduce your energy consumption and save you money. For more information, including how to participate, go to BGESmartEnergy.com.
- ▶ Even out your energy bills with Budget Billing-sign up at BGE.com/budget billing.

ATTENTION!

We know bills are high and that matters to us.

MARYLAND'S ENERGY PROBLEM — AND WHAT IT MEANS FOR YOUR BILL.

Blackout Risk

When demand is high ↗ and power supply is low ↘ the system becomes less stable, extreme heat and cold increase outage risk and blackouts become more likely.

Not enough power means higher bills and higher risk for customers.

If Nothing Changes...

- ↗ Blackout risk increases
- ↗ Energy prices keep rising
- ↗ Private power plant company profits grow

Why your electric bill is going up ↗

The biggest part of your bill is the cost of PJM Supply which is generated by private power plant owners like Calpine, NRG, Talen Energy, Vistra and Constellation.

Customers are seeing the impact of multiple forces at once. These factors together are driving upward pressure on bills.

PJM Supply costs

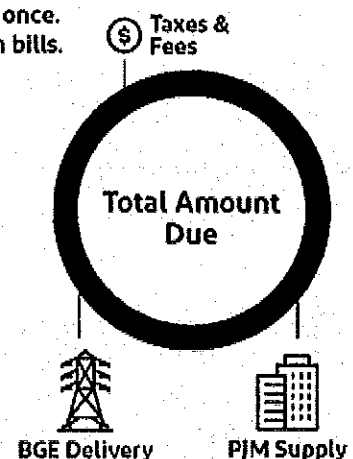

A charge for the electricity provided to you during the billing period. BGE does not control or profit from PJM Supply costs.

Delivery costs

The cost of wires, poles and equipment that deliver electricity safely and reliably to your home or business.

Fees

State and local taxes, fees, and credits including EmPOWER Maryland charges that fund energy-efficiency programs that are paid directly to the state or support state programs.

What BGE is doing for customers

Connecting customers to available assistance, including through our Customer Relief Fund.

Expanding programs that help reduce energy use and lower bills.

Protecting customers from cost impacts tied to large energy users like data centers.

Investing in technology to reduce outages and keep costs lower over time.

Advocating for utility-generated energy to increase supply.

ATTENTION!

We know bills are high and that matters to us.

MARYLAND'S ENERGY PROBLEM — AND WHAT IT MEANS FOR YOUR BILL.

Blackout Risk

When demand is high $\nearrow$ and power supply is low $\searrow$ the system becomes less stable, extreme heat and cold increase outage risk and blackouts become more likely.

Not enough power means higher bills and higher risk for customers.

If Nothing Changes...

- $\nearrow$ Blackout risk increases
- $\nearrow$ Energy prices keep rising
- $\nearrow$ Private power plant company profits grow

Why your electric bill is going up $\nearrow$

The biggest part of your bill is the cost of PJM Supply which is generated by private power plant owners like Calpine, NRG, Talen Energy, Vistra and Constellation.

Customers are seeing the impact of multiple forces at once. These factors together are driving upward pressure on bills.

PJM Supply costs

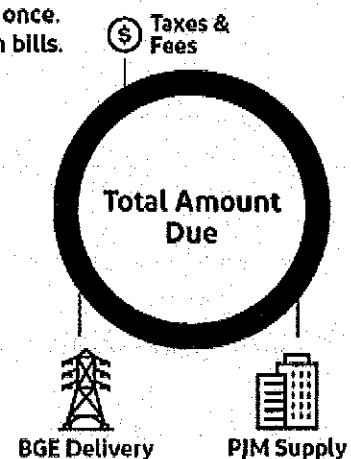

A charge for the electricity provided to you during the billing period. BGE does not control or profit from PJM Supply costs.

Delivery costs

The cost of wires, poles and equipment that deliver electricity safely and reliably to your home or business.

Fees

State and local taxes, fees, and credits including EmPOWER Maryland charges that fund energy-efficiency programs that are paid directly to the state or support state programs.

What BGE is doing for customers

Connecting customers to available assistance, including through our Customer Relief Fund.

Expanding programs that help reduce energy use and lower bills.

Protecting customers from cost impacts tied to large energy users like data centers.

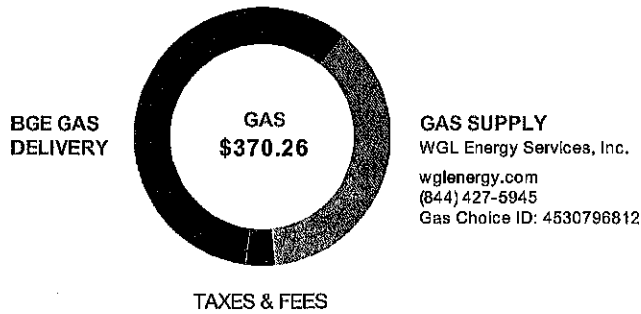

Investing in technology to reduce outages and keep costs lower over time.

Advocating for utility-generated energy to increase supply.

ATTENTION!

We know bills are high and that matters to us.

MARYLAND'S ENERGY PROBLEM — AND WHAT IT MEANS FOR YOUR BILL.

Blackout Risk

When demand is high $\nearrow$ and power supply is low $\searrow$ the system becomes less stable, extreme heat and cold increase outage risk and blackouts become more likely.

Not enough power means higher bills and higher risk for customers.

If Nothing Changes...

- $\nearrow$ Blackout risk increases
- $\nearrow$ Energy prices keep rising
- $\nearrow$ Private power plant company profits grow

Why your electric bill is going up $\nearrow$

The biggest part of your bill is the cost of PJM Supply which is generated by private power plant owners like Calpine, NRG, Talen Energy, Vistra and Constellation.

Customers are seeing the impact of multiple forces at once. These factors together are driving upward pressure on bills.

PJM Supply costs

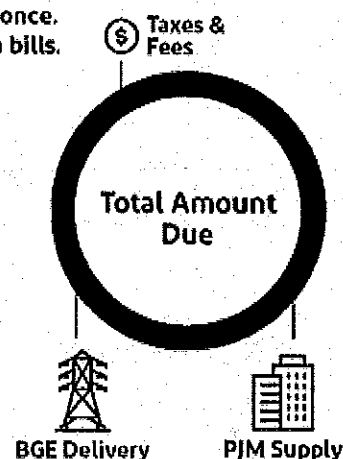

A charge for the electricity provided to you during the billing period. BGE does not control or profit from PJM Supply costs.

Delivery costs

The cost of wires, poles and equipment that deliver electricity safely and reliably to your home or business.

Fees

State and local taxes, fees, and credits including EmPOWER Maryland charges that fund energy-efficiency programs that are paid directly to the state or support state programs.

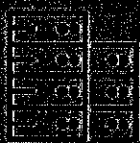

What BGE is doing for customers

Connecting customers to available assistance, including the cash on Customer Relief Fund.

Expanding programs that help reduce energy use and lower bills.

Protecting customers from cost impacts that change energy use like data centers.

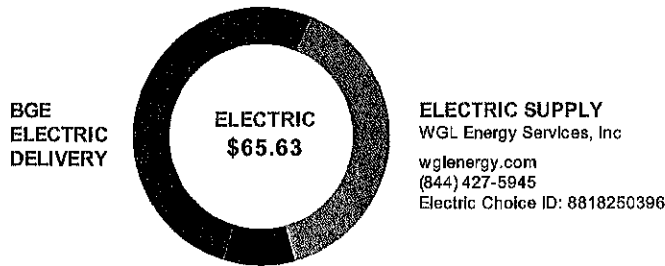

Investing in technology to reduce outages and keep costs lower over time.

Advocating for utility-generated energy to increase supply.

ATTENTION!

We know bills are high and that matters to us.

MARYLAND'S ENERGY PROBLEM — AND WHAT IT MEANS FOR YOUR BILL.

Blackout Risk

When demand is high ↗ and power supply is low ↘ the system becomes less stable, extreme heat and cold increase outage risk and blackouts become more likely.

Not enough power means higher bills and higher risk for customers.

If Nothing Changes...

- ↗ Blackout risk increases
- ↗ Energy prices keep rising
- ↗ Private power plant company profits grow

Why your electric bill is going up ↗

The biggest part of your bill is the cost of PJM Supply which is generated by private power plant owners like Calpine, NRG, Taken Energy, Vistra and Constellation.

Customers are seeing the impact of multiple forces at once. These factors together are driving upward pressure on bills.

PJM Supply costs

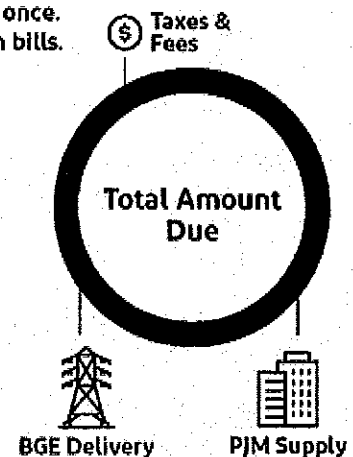

A charge for the electricity provided to you during the billing period. BGE does not control or profit from PJM Supply costs.

Delivery costs

The cost of wires, poles and equipment that deliver electricity safely and reliably to your home or business.

Fees

State and local taxes, fees, and credits including EmPOWER Maryland charges that fund energy-efficiency programs that are paid directly to the state or support state programs.

What BGE is doing for customers

Connecting customers to available assistance, including through our Customer Relief Fund.

Expanding programs that help reduce energy use and lower bills.

Protecting customers from cost impacts tied to large energy users like data centers.

Investing in technology to reduce outages and keep costs lower over time.

Advocating for utility-generated energy to increase supply.

IMPORTANT INFORMATION ABOUT YOUR BILL

- ▶ The EmPower MD charge funds programs that can help you reduce your energy consumption and save you money. For more information, including how to participate, go to BGESmartEnergy.com.
- ▶ Even out your energy bills with Budget Billing-sign up at BGE.com/budget billing.

ATTENTION!

We know bills are high and that matters to us.

MARYLAND'S ENERGY PROBLEM — AND WHAT IT MEANS FOR YOUR BILL.

Blackout Risk

When demand is high ↗ and power supply is low ↘ the system becomes less stable, extreme heat and cold increase outage risk and blackouts become more likely.

Not enough power means higher bills and higher risk for customers.

If Nothing Changes...

- ↗ Blackout risk increases
- ↗ Energy prices keep rising
- ↗ Private power plant company profits grow

Why your electric bill is going up ↗

The biggest part of your bill is the cost of PJM Supply which is generated by private power plant owners like Calpine, NRG, Talen Energy, Vistra and Constellation.

Customers are seeing the impact of multiple forces at once. These factors together are driving upward pressure on bills.

PJM Supply costs

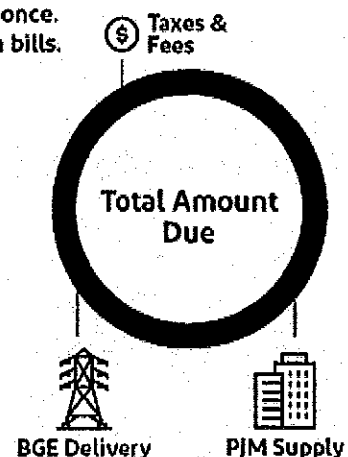

A charge for the electricity provided to you during the billing period. BGE does not control or profit from PJM Supply costs.

Delivery costs

The cost of wires, poles and equipment that deliver electricity safely and reliably to your home or business.

Fees

State and local taxes, fees, and credits including EmPOWER Maryland charges that fund energy-efficiency programs that are paid directly to the state or support state programs.

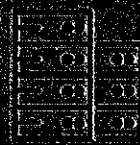

What BGE is doing for customers

Connecting customers to available assistance, including through our Customer Relief Fund.

Expanding programs that help reduce energy use and lower bills.

Protecting customers from cost impacts tied to large energy users like data centers.

Investing in modernization to reduce outages and repair costs, lower overtime.

Advocating for utility-generated energy to increase supply.

Learn more at bge.com/EnergyCosts

Additional Information

2026 Emission Disclosure BGE Calendar Year 2025 Emission Disclosure Label

The following environmental information is for BGE customers with Standard Offer Service, which is provided to those customers who have remained with BGE and who have not chosen a competitive electricity supplier. Power plants can generate electricity from a number of different fuel sources, resulting in different emissions. BGE reports fuel sources and emissions data to customers twice annually, allowing customers to compare data among the companies providing electricity service in Maryland. This disclosure is required by the Maryland Public Service Commission.

Electricity Facts - PJM Regional Data
Electricity supplied from January 1, 2025 through December 31, 2025

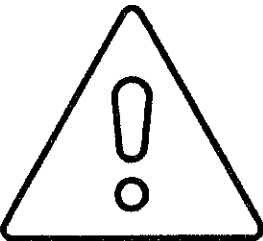

Supply Mix	
Natural Gas	43.18%
Nuclear	31.32%
Coal	16.53%
Oil	0.34%
Fuel Cell	0.03%
Renewable Energy	
*Wind	3.75%
*Solar	2.12%
*Hydroelectric	0.95%
*Solid Waste	0.46%
*Captured Methane Gas	0.53%
*Biomass	0.17%
*Waste Heat	0.08%
Total	100%
*Renewable Energy Resources Subtotal	8.06%

Air Emissions		
PJM Emission Type	Lbs. per MWh	Percentage of Regional Average
Nitrogen Oxides (NO _x)	0.25	100.0%
Sulfur Dioxide (SO ₂)	0.31	100.0%
Carbon Dioxide (CO ₂)	742.5	100.0%

CO₂ is a "greenhouse gas" which may contribute to global climate change. SO₂ and NO_x released into the atmosphere react to form acid rain. Nitrogen Oxides also react to form ground level ozone, an unhealthy component of "smog".

The EmPOWER Maryland charge funds programs that can help you reduce your energy consumption and greenhouse gas emissions, and save you money. Since the inception of the EmPOWER Maryland program in 2008, the programs have saved \$14.5 billion on installed measures at a cost of \$4.1 billion. In addition to new program costs, this charge includes paying off the uncollected costs that were accrued over time by programs required by the EmPOWER statute and authorized by the Commission. In accordance with House Bill 864 the uncollected amounts will be fully paid by the end of 2032. For more information, including how to participate in these valuable programs go to bgesmartenergy.com.

Gas Safety

If you detect signs of a gas leak leave the premise, go at least **100** feet away, and call **911** immediately or BGE at **877.778.7798**. For more information visit [bge.com/ GasSafety](https://bge.com/GasSafety).

ATTENTION!

We know bills are high and that matters to us.

MARYLAND'S ENERGY PROBLEM — AND WHAT IT MEANS FOR YOUR BILL.

Blackout Risk

When demand is high ↗ and power supply is low ↘ the system becomes less stable, extreme heat and cold increase outage risk and blackouts become more likely.

Not enough power means higher bills and higher risk for customers.

If Nothing Changes...

- ↗ Blackout risk increases
- ↗ Energy prices keep rising
- ↗ Private power plant company profits grow

Why your electric bill is going up ↗

The biggest part of your bill is the cost of PJM Supply which is generated by private power plant owners like Calpine, NRG, Talen Energy, Vistra and Constellation.

Customers are seeing the impact of multiple forces at once. These factors together are driving upward pressure on bills.

PJM Supply costs

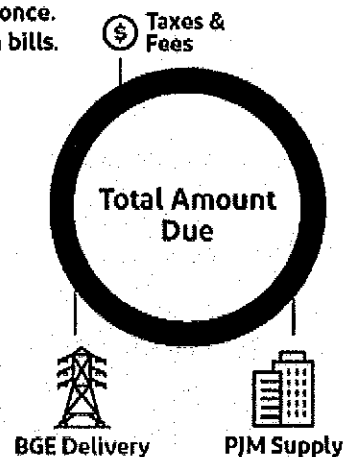

A charge for the electricity provided to you during the billing period. BGE does not control or profit from PJM Supply costs.

Delivery costs

The cost of wires, poles and equipment that deliver electricity safely and reliably to your home or business.

Fees

State and local taxes, fees, and credits including EmPOWER Maryland charges that fund energy-efficiency programs that are paid directly to the state or support state programs.

What BGE is doing for customers

Connecting customers to available assistance, including through our Customer Rate Fund.

Expanding programs that help reduce energy use and lower bills.

Protecting customers from cost impacts such as large energy users like data centers.

Investing in technology to reduce outages and keep costs lower over time.

Advocating for utility-generated energy to increase supply.

Learn more at bge.com/EnergyCosts

Additional Information

2026 Emission Disclosure BGE Calendar Year 2025 Emission Disclosure Label

The following environmental information is for BGE customers with Standard Offer Service, which is provided to those customers who have remained with BGE and who have not chosen a competitive electricity supplier. Power plants can generate electricity from a number of different fuel sources, resulting in different emissions. BGE reports fuel sources and emissions data to customers twice annually, allowing customers to compare data among the companies providing electricity service in Maryland. This disclosure is required by the Maryland Public Service Commission.

Electricity Facts - PJM Regional Data
Electricity supplied from January 1, 2025 through December 31, 2025

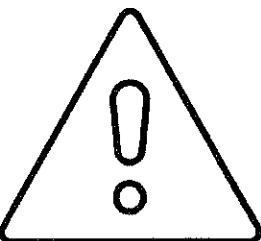

Supply Mix	
Natural Gas	43.18%
Nuclear	31.32%
Coal	16.53%
Oil	0.34%
Fuel Cell	0.03%
Renewable Energy	
*Wind	3.75%
*Solar	2.12%
*Hydroelectric	0.95%
*Solid Waste	0.46%
*Captured Methane Gas	0.53%
*Biomass	0.17%
*Waste Heat	0.08%
Total	100%
*Renewable Energy Resources Subtotal	8.06%

Air Emissions		
PJM Emission Type	Lbs. per MWh	Percentage of Regional Average
Nitrogen Oxides (NO _x)	0.25	100.0%
Sulfur Dioxide (SO ₂)	0.31	100.0%
Carbon Dioxide (CO ₂)	742.5	100.0%

CO₂ is a "greenhouse gas" which may contribute to global climate change. SO₂ and NO_x released into the atmosphere react to form acid rain. Nitrogen Oxides also react to form ground level ozone, an unhealthy component of "smog".

EmPOWER MARYLAND

The EmPOWER Maryland charge funds programs that can help you reduce your energy consumption and greenhouse gas emissions, and save you money. Since the inception of the EmPOWER Maryland program in 2008, the programs have saved \$14.5 billion on installed measures at a cost of \$4.1 billion. In addition to new program costs, this charge includes paying off the uncollected costs that were accrued over time by programs required by the EmPOWER statute and authorized by the Commission. In accordance with House Bill 864 the uncollected amounts will be fully paid by the end of 2032. For more information, including how to participate in these valuable programs go to bgesmartenergy.com.

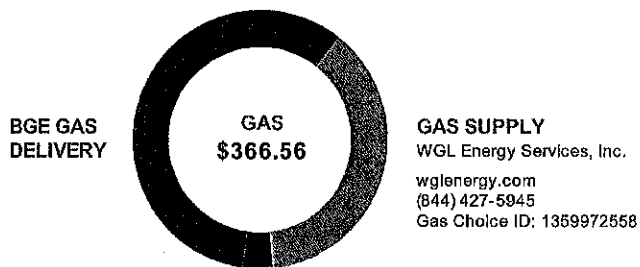

Gas Safety

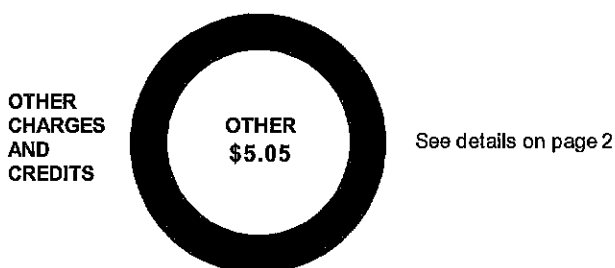

If you detect signs of a gas leak leave the premise, go at least **100** feet away, and call **911** immediately or BGE at **877.778.7798**. For more information visit [bge.com/ GasSafety](https://bge.com/GasSafety).

IMPORTANT INFORMATION ABOUT YOUR BILL

- ▶ The EmPower MD charge funds programs that can help you reduce your energy consumption and save you money. For more information, including how to participate, go to BGESmartEnergy.com.
- ▶ Even out your energy bills with Budget Billing-sign up at BGE.com/budget billing.

ATTENTION!

We know bills are high and that matters to us.

MARYLAND'S ENERGY PROBLEM — AND WHAT IT MEANS FOR YOUR BILL.

Blackout Risk

When demand is high ↗ and power supply is low ↘ the system becomes less stable, extreme heat and cold increase outage risk and blackouts become more likely.

Not enough power means higher bills and higher risk for customers.

If Nothing Changes...

- ↗ Blackout risk increases
- ↗ Energy prices keep rising
- ↗ Private power plant company profits grow

Why your electric bill is going up ↗

The biggest part of your bill is the cost of PJM Supply which is generated by private power plant owners like Calpine, NRG, Talen Energy, Vistra and Constellation.

Customers are seeing the impact of multiple forces at once. These factors together are driving upward pressure on bills.

PJM Supply costs

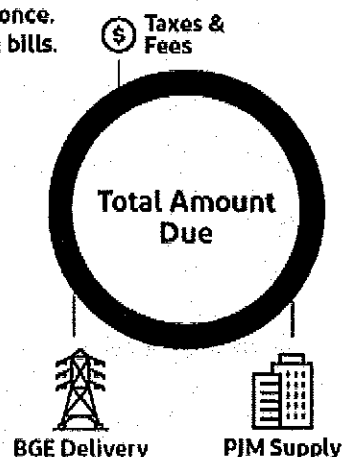

A charge for the electricity provided to you during the billing period. BGE does not control or profit from PJM Supply costs.

Delivery costs

The cost of wires, poles and equipment that deliver electricity safely and reliably to your home or business.

Fees

State and local taxes, fees, and credits including EmPOWER Maryland charges that fund energy-efficiency programs that are paid directly to the state or support state programs.

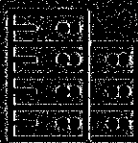

What BGE is doing for customers

Connecting customers to available assistance, including through our Customer Relief Fund.

Expanding programs that help reduce energy use and lower bills.

Protecting customers from cost impacts due to large energy users like data centers.

Investing in technology to reduce outages and keep costs lower over time.

Advocating for utility-generated energy to increase supply.

ATTENTION!

We know bills are high and that matters to us.

MARYLAND'S ENERGY PROBLEM — AND WHAT IT MEANS FOR YOUR BILL.

Blackout Risk

When demand is high ↗ and power supply is low ↘ the system becomes less stable, extreme heat and cold increase outage risk and blackouts become more likely.

Not enough power means higher bills and higher risk for customers.

If Nothing Changes...

- ↗ Blackout risk increases
- ↗ Energy prices keep rising
- ↗ Private power plant company profits grow

Why your electric bill is going up ↗

The biggest part of your bill is the cost of PJM Supply which is generated by private power plant owners like Calpine, NRG, Talen Energy, Vistra and Constellation.

Customers are seeing the impact of multiple forces at once. These factors together are driving upward pressure on bills.

PJM Supply costs

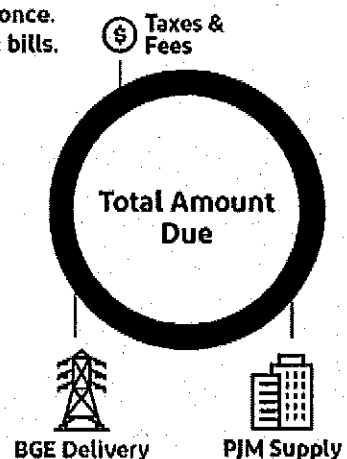

A charge for the electricity provided to you during the billing period. BGE does not control or profit from PJM Supply costs.

Delivery costs

The cost of wires, poles and equipment that deliver electricity safely and reliably to your home or business.

Fees

State and local taxes, fees, and credits including EmPOWER Maryland charges that fund energy-efficiency programs that are paid directly to the state or support state programs.

What BGE is doing for customers

Connecting customers to available assistance, including through our Customer Relief Fund.

Expanding programs that help reduce energy use and lower bills.

Protecting customers from cost impacts due to large energy users like data centers.

Investing in technology to reduce outages and keep costs lower over time.

Advocating for utility generated energy to increase supply.

Additional Information

2026 Emission Disclosure BGE Calendar Year 2025 Emission Disclosure Label

The following environmental information is for BGE customers with Standard Offer Service, which is provided to those customers who have remained with BGE and who have not chosen a competitive electricity supplier. Power plants can generate electricity from a number of different fuel sources, resulting in different emissions. BGE reports fuel sources and emissions data to customers twice annually, allowing customers to compare data among the companies providing electricity service in Maryland. This disclosure is required by the Maryland Public Service Commission.

Electricity Facts - PJM Regional Data Electricity supplied from January 1, 2025 through December 31, 2025

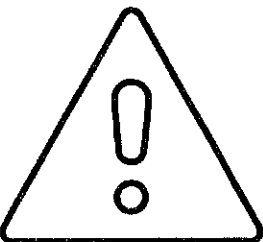

Supply Mix	
Natural Gas	43.18%
Nuclear	31.32%
Coal	16.53%
Oil	0.34 %
Fuel Cell	0.03 %
Renewable Energy	
*Wind	3.75 %
*Solar	2.12 %
*Hydroelectric	0.95 %
*Solid Waste	0.46 %
*Captured Methane Gas	0.53 %
*Biomass	0.17 %
*Waste Heat	0.08 %
Total	100 %
*Renewable Energy Resources Subtotal	8.06 %

Air Emissions		
PJM Emission Type	Lbs. per MWh	Percentage of Regional Average
Nitrogen Oxides (NO _x)	0.25	100.0 %
Sulfur Dioxide (SO ₂)	0.31	100.0 %
Carbon Dioxide (CO ₂)	742.5	100.0 %

CO₂ is a "greenhouse gas" which may contribute to global climate change. SO₂ and NO_x released into the atmosphere react to form acid rain. Nitrogen Oxides also react to form ground level ozone, an unhealthy component of "smog".

The EmPOWER Maryland charge funds programs that can help you reduce your energy consumption and greenhouse gas emissions, and save you money. Since the inception of the EmPOWER Maryland program in 2008, the programs have saved \$14.5 billion on installed measures at a cost of \$4.1 billion. In addition to new program costs, this charge includes paying off the uncollected costs that were accrued over time by programs required by the EmPOWER statute and authorized by the Commission. In accordance with House Bill 864 the uncollected amounts will be fully paid by the end of 2032. For more information, including how to participate in these valuable programs go to bgesmartenergy.com.

MARYLAND'S ENERGY PROBLEM — AND WHAT IT MEANS FOR YOUR BILL.

Blackout Risk

When demand is high ↗ and power supply is low ↘ the system becomes less stable, extreme heat and cold increase outage risk and blackouts become more likely.

Not enough power means higher bills and higher risk for customers.

If Nothing Changes...

- ↗ Blackout risk increases
- ↗ Energy prices keep rising
- ↗ Private power plant company profits grow

Why your electric bill is going up ↗

The biggest part of your bill is the cost of PJM Supply which is generated by private power plant owners like Calpine, NRG, Talen Energy, Vistra and Constellation.

Customers are seeing the impact of multiple forces at once. These factors together are driving upward pressure on bills.

PJM Supply costs

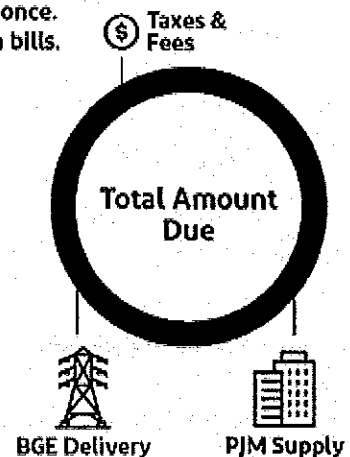

A charge for the electricity provided to you during the billing period. BGE does not control or profit from PJM Supply costs.

Delivery costs

The cost of wires, poles and equipment that deliver electricity safely and reliably to your home or business.

Fees

State and local taxes, fees, and credits including EmPOWER Maryland charges that fund energy-efficiency programs that are paid directly to the state or support state programs.

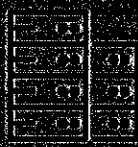

What BGE is doing for customers

Connecting customers to available assistance, including through our Customer Relief Fund.

Expanding programs that help reduce energy use and lower bills.

Protecting customers from cost impacts tied to large energy users like data centers.

Investing in technology to reduce outages and keep wires lower over time.

Advocating for utility generated energy to increase supply.

Additional Information

2026 Emission Disclosure BGE Calendar Year 2025 Emission Disclosure Label

The following environmental information is for BGE customers with Standard Offer Service, which is provided to those customers who have remained with BGE and who have not chosen a competitive electricity supplier. Power plants can generate electricity from a number of different fuel sources, resulting in different emissions. BGE reports fuel sources and emissions data to customers twice annually, allowing customers to compare data among the companies providing electricity service in Maryland. This disclosure is required by the Maryland Public Service Commission.

Electricity Facts - PJM Regional Data
Electricity supplied from January 1, 2025 through December 31, 2025

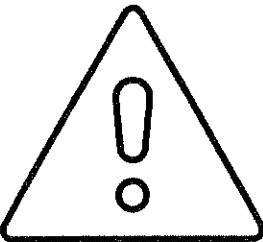

Supply Mix	
Natural Gas	43.18%
Nuclear	31.32%
Coal	16.53%
Oil	0.34 %
Fuel Cell	0.03 %
Renewable Energy	
*Wind	3.75 %
*Solar	2.12 %
*Hydroelectric	0.95 %
*Solid Waste	0.46 %
*Captured Methane Gas	0.53 %
*Biomass	0.17 %
*Waste Heat	0.08 %
Total	100 %
*Renewable Energy Resources Subtotal	8.06 %

Air Emissions		
PJM Emission Type	Lbs. per MWh	Percentage of Regional Average
Nitrogen Oxides (NO _x)	0.25	100.0 %
Sulfur Dioxide (SO ₂)	0.31	100.0 %
Carbon Dioxide (CO ₂)	742.5	100.0 %

CO₂ is a "greenhouse gas" which may contribute to global climate change. SO₂ and NO_x released into the atmosphere react to form acid rain. Nitrogen Oxides also react to form ground level ozone, an unhealthy component of "smog".

EmPOWER MARYLAND

The EmPOWER Maryland charge funds programs that can help you reduce your energy consumption and greenhouse gas emissions, and save you money. Since the inception of the EmPOWER Maryland program in 2008, the programs have saved \$14.5 billion on installed measures at a cost of \$4.1 billion. In addition to new program costs, this charge includes paying off the uncollected costs that were accrued over time by programs required by the EmPOWER statute and authorized by the Commission. In accordance with House Bill 864 the uncollected amounts will be fully paid by the end of 2032. For more information, including how to participate in these valuable programs go to bgesmartenergy.com.

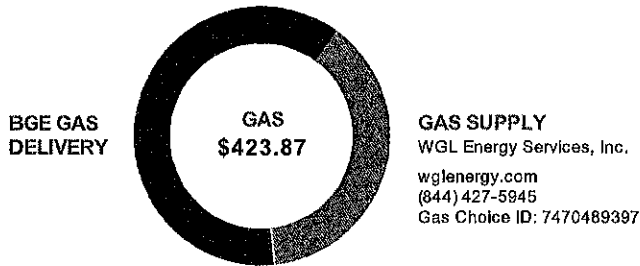

Gas Safety

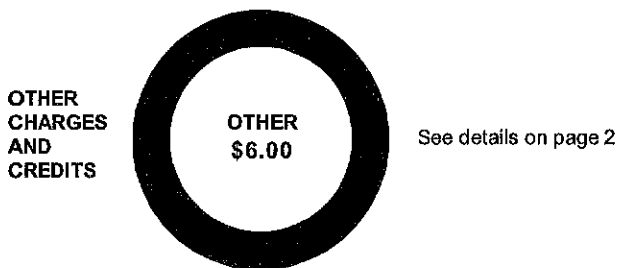

If you detect signs of a gas leak leave the premise, go at least **100 feet** away, and call **911** immediately or BGE at **877.778.7798**. For more information visit [bge.com/ GasSafety](https://bge.com/GasSafety).

ATTENTION!

We know bills are high and that matters to us.

MARYLAND'S ENERGY PROBLEM — AND WHAT IT MEANS FOR YOUR BILL.

Blackout Risk

When demand is high ↗ and power supply is low ↘ the system becomes less stable, extreme heat and cold increase outage risk and blackouts become more likely.

Not enough power means higher bills and higher risk for customers.

If Nothing Changes...

- ↗ Blackout risk increases
- ↗ Energy prices keep rising
- ↗ Private power plant company profits grow

Why your electric bill is going up ↗

The biggest part of your bill is the cost of PJM Supply which is generated by private power plant owners like Calpine, NRG, Talen Energy, Vistra and Constellation.

Customers are seeing the impact of multiple forces at once. These factors together are driving upward pressure on bills.

PJM Supply costs

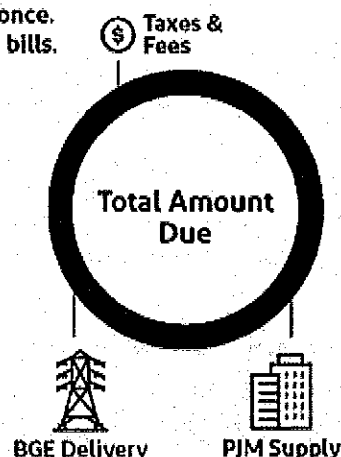

A charge for the electricity provided to you during the billing period. BGE does not control or profit from PJM Supply costs.

Delivery costs

The cost of wires, poles and equipment that deliver electricity safely and reliably to your home or business.

Fees

State and local taxes, fees, and credits including EmPOWER Maryland charges that fund energy-efficiency programs that are paid directly to the state or support state programs.

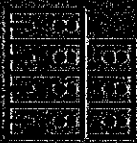

What BGE is doing for customers

Continuing customers to available assistance, including through our Customer Relief Fund.

Expanding programs that help reduce energy use and lower bills.

Protecting customers from cost impacts tied to large energy users like data centers.

Investing in technology to reduce outages and keep costs lower over time.

Advocating for utility-generated energy to increase supply.

Learn more at bge.com/EnergyCosts

Additional Information

2026 Emission Disclosure BGE Calendar Year 2025 Emission Disclosure Label

The following environmental information is for BGE customers with Standard Offer Service, which is provided to those customers who have remained with BGE and who have not chosen a competitive electricity supplier. Power plants can generate electricity from a number of different fuel sources, resulting in different emissions. BGE reports fuel sources and emissions data to customers twice annually, allowing customers to compare data among the companies providing electricity service in Maryland. This disclosure is required by the Maryland Public Service Commission.

Electricity Facts - PJM Regional Data
Electricity supplied from January 1, 2025 through December 31, 2025

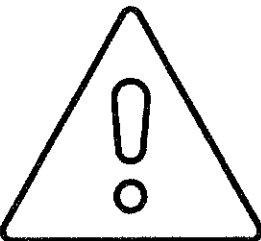

Supply Mix	
Natural Gas	43.18%
Nuclear	31.32%
Coal	16.53%
Oil	0.34 %
Fuel Cell	0.03 %
Renewable Energy	
*Wind	3.75 %
*Solar	2.12 %
*Hydroelectric	0.95 %
*Solid Waste	0.46 %
*Captured Methane Gas	0.53 %
*Biomass	0.17 %
*Waste Heat	0.08 %
Total	100 %
*Renewable Energy Resources Subtotal	8.06 %

Air Emissions		
PJM Emission Type	Lbs. per MWh	Percentage of Regional Average
Nitrogen Oxides (NO _x)	0.25	100.0 %
Sulfur Dioxide (SO ₂)	0.31	100.0 %
Carbon Dioxide (CO ₂)	742.5	100.0 %

CO₂ is a "greenhouse gas" which may contribute to global climate change. SO₂ and NO_x released into the atmosphere react to form acid rain. Nitrogen Oxides also react to form ground level ozone, an unhealthy component of "smog".

EmPOWER MARYLAND

The EmPOWER Maryland charge funds programs that can help you reduce your energy consumption and greenhouse gas emissions, and save you money. Since the inception of the EmPOWER Maryland program in 2008, the programs have saved \$14.5 billion on installed measures at a cost of \$4.1 billion. In addition to new program costs, this charge includes paying off the uncollected costs that were accrued over time by programs required by the EmPOWER statute and authorized by the Commission. In accordance with House Bill 864 the uncollected amounts will be fully paid by the end of 2032. For more information, including how to participate in these valuable programs go to bgesmartenergy.com.

Gas Safety

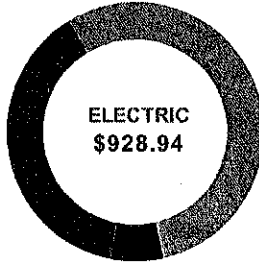

If you detect signs of a gas leak leave the premise, go at least **100** feet away, and call **911** immediately or BGE at **877.778.7798**. For more information visit [bge.com/ GasSafety](https://bge.com/GasSafety).
